

Meet SAMSON Materials Handling Ltd. at Hillhead 2016

Ely, UK, April 2016

SAMSON Materials Handling design and manufacture a range of mobile equipment for effective conveying of materials for diverse mining and quarrying operations. From pit face to onward processing and export SAMSON provide equipment that minimises touchpoints and maximises efficiency.

SAMSON specialises in tailoring equipment to the precise needs of the individual customer. SAMSON will be showcasing solutions and expertise gleaned in almost 50 years of experience.

SAMSON Stormajor® Boom Feeder

The SAMSON Material Feeder eliminates the need for fixed civil works and truck ramps. It is the ideal mobile solution to receive materials such as coal and aggregates where fixed plant is not a viable option. Stockpiling is made simple with minimal movement of equipment. The Stormajor® range can be tailored to specific stockpiling requirements in terms of material characteristics and space for stockpile. Barge, ship or rail car loading is facilitated with an outloading boom and controlled discharge rates. The Stormajor is compatible with wheel loaders, articulated dump trucks and road tipping trucks. Best of all the Stormajor range is highly manoeuvrable and can be removed from the area when not in operation and the boom can be folded in for transport.

For larger shipping requirements the SAMSON Shiploader can quickly convert a multi-purpose berth. It can be used for loading bulk carriers to post Panamax size and when combined with twin SAMSON Material Feeders peak loading rates of over 2,000 tons per hour are possible with through the ship rates in excess of 1,500 tons per hour.

The SAMSON Eco Hopper is a dust controlled grab unloading hopper which provides an economically and ecologically sensitive solution designed to suit the characteristics and flow properties of virtually any bulk material such as limestone, iron ore, bauxite, coal, clinker etc. Rates of up to 5,000 tons per hour can be achieved depending on the grab crane's performance.

About the AUMUND Group

The AUMUND Group is active worldwide. The conveying and storage specialists have special expertise at their disposal when dealing with bulk materials. With their high degree of individuality, both its technically sophisticated as well as innovative products have contributed to the AUMUND Group today being a market leader in many areas of conveying and storage technology. The manufacturing companies AUMUND Fördertechnik GmbH (Rheinberg, Germany), SCHADE Lagertechnik GmbH (Gelsenkirchen, Germany), SAMSON Materials Handling Ltd. (Ely, England), as well as AUMUND Logistic GmbH (Rheinberg, Germany) are consolidated under the umbrella of the AUMUND Group. In conjunction with the headquarters of the manufacturing companies, the global conveying and storage technology business is spearheaded through a total of ten subsidiaries in Europe, Asia, North and South America and supported by four warehouses in Germany, Hong Kong, USA and Brazil.
